

PYTHON

CERTIFICATION COURSE

**Master Python Skills and take your
Career to the next Leve!**

Python Course

Python Course, offered by W3 Technologies, will help you confidently code and solve problems through modular software development using Object-Oriented Programming (OOP). You'll learn to break down complex tasks into efficient, readable, and maintainable code, with a strong focus on Python syntax and OOP techniques for logical program structure.

Why W3 Technologies

Training at W3 Technologies equips you to excel in today's competitive world. From the very beginning of your journey with us, you'll experience continuous growth through learning. We provide support throughout the course, while encouraging you to become independent and confident in your skills.

Lower Learning Cost

Learning with us is budget-friendly. Our courses are affordable yet provide comprehensive and engaging content.

Expert Instructors

Learning with us means benefiting from top-tier expertise. Our expert instructors provide deep knowledge and engaging lessons.

Certification

Earn an industry-recognized certification upon completing the course, enhancing your resume.

Python Introduction

- Introduction to Programming
- Choosing Python
- Setting Up Python environment
- Python IDEs

Basic Syntax and Data Types

- Input/output
- Comments
- Variables
- Data types
- Typecasting

Operations In Python

- Arithmetic
- Assignments
- Comparison
- Logical
- Identity
- Membership
- Bitwise Operators

Strings In Python

- Creating
- Formatting
- Indexing
- Slicing
- String Methods

Control Flow Statements

- Creating
- Properties
- Indexing
- Slicing
- Methods
- Modifying Lists

Tuples In Python

- Syntax
- Properties
- Indexing
- Slicing
- Methods

Sets In Python

- Syntax
- Updating
- Operations
- Methods

Dictionaries In Python

- Syntax
- Keys/Values
- Accessing
- Function Pointers
- methods

Conditional Statements

- if
- if-else
- if-elif-else

Loops

- While
- For
- Break
- Continue
- Pass
- Range

List and Dictionary Comprehensions

- Syntax
- Uses

Functions

- Creating
- Calling
- Arguments
- Variables
- Recursion

Anonymous Functions

- Lambda Function

Generators In Python

- Creating
- Using Generators

Modules In Python

- Creating
- Importing
- Built-in modules

Packages and Data Analysis

- Creating Packages
- Numpy
- Pandas
- Matplotlib

Data and Time

- Date
- Time
- Datetime Modules

Regex In Python

- Re Module
- Common Functions

Files In Python

- Opening
- Reading
- Writing
- Closing Files

Object Oriented

- Overview of OOP
- The Self Variable
- Constructor
- Types of Variables
- Namespaces
- Creating Classes and Objects
- Inheritance
- Polymorphism
- Data Abstraction
- Encapsulation

Thank You for Choosing **W3 Technologies**

Thank you for choosing to explore this course from W3 Technologies. We hope you find it insightful and valuable as you embark on your learning journey.

At W3 Technologies, we believe that learning is a continuous process, and we are excited to be part of your journey towards gaining new skills and knowledge.
